

KNEE JOINT TREATMENT : WHAT'S NEW ?

CARTILAGE DAMAGE

- It is a permanent defect.
- It will not "heal on its own."
- Injury will lead to severe Osteoarthritis / knee replacement in longtime.

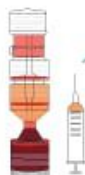

WHAT'S NEW: AUTOLOGOUS BONE MARROW CELL THERAPY

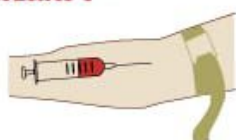

- It can make smoother cartilage by regeneration.
- Relieve the symptoms of pain and improve your mobility.
- Prevent further damage and avoid knee replacement in future.

AUTOLOGOUS BONE MARROW ASPIRATE CONCENTRATE THERAPY

PLATELET RICH PLASMA THERAPY

Aspirate

Concentrate

Inject

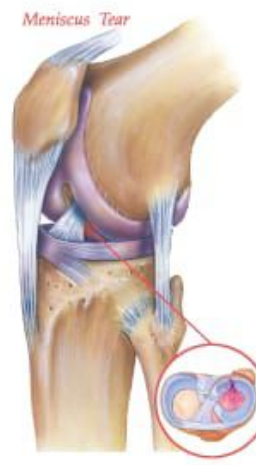

LIGAMENT & MENISCUS: WHAT'S NEW?

The Issue - By nature the ligament & meniscus have poor blood supply, and will take long time to heal.

The Solution - Your own blood which has enormous amount of platelets, which has the capability to address pain and mobility issues.

The Procedure - A small amount of blood is taken to concentrate the platelets and given as injection into the ligament/ meniscus.

Issued in public interest and as a part of Academic initiative from TriCell Biologics.
